Certified composite

SUSTAINABILITY MATTERS

These are made from sustainably-sourced TENCEL™ Modal fibers. As a renewable resource, birch trees are consciously farmed and turned into fiber.

OEKO-TEX® guarantees that our end products are tested and proven free from harmful toxic chemicals.

The waistband is GRS-certified, as the elastic comes from post-consumer recycled Polyester.

An accreditation with Canopy ensures these cellulose fabrics aren't being produced at the expense of ancient and endangered forests, nor impact the species that inhabit them.

★★★★★ Great!

30/08/25

I have like 10 pairs of BN3TH now. 3 pairs of the direct competitors, which I never wear anymore as they ride up and give wedges. These are soft, don't ride up, great comfort that lasts all day. Cannot recommend enough

★★★★★ Love these Boxers

03/09/25

From the moment I started wearing the boxers I was impressed with the quality and comfort. I am usually not one to spend a ton of money on boxers but these are great value.

★★★★★ great boxers

03/09/25

I usually don't spend much money on boxers; however, these are exceptional value. They fit great and are comfortable all day, even during sporting events.

★★★★★ Most comfortable underwear to date

11/08/25

Most comfortable underwear I have tried out of many on the search for briefs that dont ride up. Tencel fabric is also very comfortable. Important to not over size. I wear size 30 to 31 and wear a size small. Its a good fit, not loose.
